

CALROY

Healthy vascular function is essential to every organ and system in the body

Breakthroughs in scientific knowledge have brought a critical structure to the fore: the endothelial glycocalyx. This slippery, micro-thin inner lining of every blood vessel in the body performs many important functions, including:

- Harboring antioxidants, coagulation factors, and more
- Regulating passage of molecules through to the endothelium
- Triggering nitric oxide production and resulting vasodilation

The endothelial glycocalyx supports every blood vessel in the body.

That's hugely important for your vascular system.

- ① Endothelial Glycocalyx
- ② Artery Wall

CALROY

Supports the structure and normal functions of the endothelial glycocalyx*

Arterosil HP® is the world's premier supplement to support the endothelial glycocalyx*, the fragile inner lining of the entire vascular system.

Arterosil HP contributes to healthy vascular function in multiple ways:*

- Arterosil HP supports normal circulation*
- Arterosil HP helps support normal artery function*
- Arterosil HP helps maintain a healthy artery wall*
- Arterosil HP supports a healthy heart*
- Arterosil HP supports a strong and vital glycocalyx—the micro-thin gel lining in your veins and arteries.*

Supplement Facts

Serving Size: 2 Capsules
Servings Per Container: 30
